

Promoting choice and value for all gas and electricity customers

Could allow DUoS customers to contribute to strategic investment up to the level they would have funded under an incremental approach.

Overall costs lower with strategic investment but DUoS customers are neutral to this.

Sole use cost likely to be cheaper with strategic approach as customers are closer to the created capacity.

Customers/third party can receive additional contribution should other connectees make use of spare capacity in 5 years

Requires co-ordination of connecting customers under a single agreement

Connecting customers benefit from lower costs
