## Appendix 1: List of Mayor's Design Advocates

There are 41 built environment professionals who have been selected, based on their skills and experience, to help the Mayor support London's growth. They are independent and impartial; and will provide support, advice, critiques and expertise on London's built environment.

The Mayor's Design Advocates offer a broad range of expertise from across the sector. They include practitioners, academics, policymakers and those from community-led initiatives, and bring experience from both the public and private sector.

Of all advocates, 55 per cent are women, and 45 per cent are from an ethnic minority background.
