

Mayor's London Infrastructure Group (LIG) meeting minutes

3rd June 2025, 9.30 - 12:00

Fora, Soap Yards, Borough Yards

Attendees

Ailis McKernan, Virgin Media 02
Alex Nickson, Thames Water
Antony Meanwell, E. ON
Ben Harries, Ofcom
Charlotte Wood, Environment Agency
Chris Burchell, SSEN
Elliot Treharne, GLA
Fiona Fletcher-Smith, L&Q and G15rep
Gabriele Caprotti, GLA
Glenn Norman, SGN
Helen Huemer-Markides, GLA
James Harrison, Cadent Gas
James Veane, Ofgem
Joanna Clark, Network Rail
Cllr. Kieron Williams, London Councils
Lawrence Summers, M Group Water

Margaret Waite, TfL
Mark Adolphus, UKPN
Mark Lissimore, National Grid
Roger Bailey, Tideway
Tadas Buivydas, Affinity Water

Observers

Andrew Sherry, TfL
Andrew McMunnigall, GLA
Laura Citron, London & Partners
Nick McKeogh, NLA
Nisa Vishwanath, GLA
Richard Buckley, SGN
Simona Webb, GLA
Stephen King, London Councils

Chair: Jules Pipe (Deputy Mayor, Planning, Regeneration and the Fire Service)

Meeting format

In-person at Borough Yards, with 21 infrastructure and utility senior executives from LIG organisations and the Greater London Authority (GLA) seated in a conference format. 8 observers from GLA, TfL, SGN, NLA, London & Partners and London Councils assisted.

Item	Minutes	Actions
Welcome, Deputy Mayor Jules Pipe	Deputy Mayor Jules Pipe set out the purpose and ambition of the LIG, welcoming new LIG members and observers: - Antony Meanwell, Heat Zone Development & Decarbonisation Director at E.ON, representing heat networks on behalf of the Heat Networks Industry Council. He also welcomed two observers with a special interest in the London Infrastructure Framework (LIF): - Nick McKeogh, CEO of New London Architecture (NLA) representing London's built environment. - Laura Citron, CEO of London & Partners, representing London's business growth and destination agency. The previous LIG meeting's items were recapped – decarbonisation efforts to collaboratively meet Net Zero and climate resilience goals – whilst setting out the focus of this meeting: providing an update on activities from the ICS and TfL, discussing strategic priorities for long term planning of	

	infrastructure at the London and national levels, focused on the key infrastructure-related implications of the upcoming London Plan and introduce the 2025 London Infrastructure Framework (LIF) refresh.	
Infrastructure Coordination Service – update, Gabriele Caprotti (GLA)	Gabriele Caprotti (GLA) presented an overview of ongoing activity and upcoming work across the ICS service lines and teams – Planning, Development, Streets and Data. Key updates included local area energy planning, integrated water management strategies, West London capacity constraints and the SuDS & Streetworks Market project.	ICS: To share the ‘Optimising Data Centres in London - Heat Reuse’ report
TfL Streets 2030 vision, Margaret Waite (TfL)	Margaret Waite (TfL) provided an overview of the Streets Performance 2030 Vision. This included updates on London’s streets performance and work programmes aimed at improving bus journey times, reducing traffic and improving road safety, with discussion around how to better engage communities.	TfL: To share a forward look on relevant Lane Rental schemes proposals
Towards a New London Plan, Sophie Donaldson (GLA)	Sophie Donaldson (GLA) from the London Plan team provided an overview of the upcoming ‘Towards a new London Plan’ document including a timeline of key milestones, engagement and relevance to the infrastructure sector, including the dual priorities of housing and economy, and how best to make use of brownfield sites. Discussion included consideration on how best to manage upcoming data centre growth, based on recent experience.	All: To engage with the London Plan consultation.
London Infrastructure Framework - update, Cllr. Keiron Williams (London Councils)	Cllr. Keiron Williams (London Councils) introduced the need for a 2025 London Infrastructure Framework, highlighting the importance of London’s infrastructure and investment needs. This set the context on the upcoming focus on prioritisation, sequential delivery and private investment.	
London Infrastructure Framework – GLA update, Helen Huemer-Markides (GLA)	Helen Huemer-Markides (GLA) discussed the strategic infrastructure and economic priorities that will be addressed in the LIF refresh across transport, energy, water, flood defences, digital connectivity and data centres. Key objectives and expected outputs of the LIF refresh were shared, setting out how LIG member organisations will be consulted across later stages of the programme.	
Plenary Discussion, LIG Members	Deputy Mayor Jules Pipe Jules welcomed discussion and comments from LIG members on how their organizations can collaborate towards the LIF refresh. LIG representatives provided valuable contributions during the plenary session, with stakeholders raising a number of key points: - Bringing forward better regulation (network zoning) and a skilled workforce (green skills and learning programmes) to support ambitious delivery targets across the Heat Networks industry; - Aligning the 2025 London Infrastructure Framework with the five growth sectors that will drive London’s	All: To collaborate with the ICS on the development of the 2025 London Infrastructure Framework.

	future economy to explore enhanced commercial models for attracting investment; - Highlighting priorities on sustainable drainage systems and the Thames Estuary 2100 plans that includes Thames Barrier; - Learning from previous regulatory cycles and insights from similar processes (such as the full fibre rollout). - Bringing about a longer outlook and more comprehensive strategic development planning to inform relevant price control frameworks; - Endorsement of local area energy planning, emphasising the value of jointly planning around future demand scenarios.	
Discussion Summary	Gabriele Caprotti (GLA) concluded the LIG meeting with a brief summary of what was covered during the plenary discussion, noting that the GLA would plan on considering and taking forward: - Incorporating key principles that the 2025 London Infrastructure Framework needs to integrate, including helping stakeholders better understand where and when infrastructure is needed, considering scalability, as well as taking note of cross-cutting enablers and blockers; - Enabling forward strategic planning; - Providing the market and supply chain with confidence on the upcoming investment pipeline; - Needing to set out approaches to engaging with specific types of infrastructure (data centres and heat networks); - Securing closer partnership working across industry.	ICS: To integrate key points raised as part of the 2025 London Infrastructure Framework.
AOB and close	Deputy Mayor Jules Pipe asked LIG members for any closing comments and thanked members for their continued support on co-ordination and partnership working.
