### GREATER LONDON AUTHORITY

### **REQUEST FOR MAYORAL DECISION – MD1469**

### Title: The Mayor's High Street Fund 2015-16

### **Executive Summary:**

This MD sets out the proposed use of the remaining Mayoral High Street Funds allocation of £8,353,000 (£7,446,815 capital and £866,185 revenue) and seeks approval for the related 42 grant awards to 21 London boroughs and 15 voluntary sector organisations, charities and traders' groups along with approval for the use of £40,000 of these funds for evaluation purposes. It also seeks delegation of approval for the use of £400,000 of expenditure on the commissioning and development of high street regeneration projects to maximise growth potential.

### Decision:

1

The Mayor

- i) Approves the grant award of £7,713,000 to the 25 highest ranking large-scale applications;
- ii) Approves the grant award of £314,452 to the 17 highest ranking applications made via the Mayor's High Streets Space Hive online platform;
- iii) Delegates to the Executive Director Development Enterprise & Environment decisions for the expenditure of a further £285,548 for at least one further wave of Mayor's High Streets Space Hive applications;
- iv) Approves expenditure of up to £40,000 for the evaluation of High Street Fund projects upon completion; and
- v) Delegates to the Executive Director Development Enterprise & Environment decisions for the expenditure of £400,000 to establish a 'commissioning fund' i.e. the commissioning and development of high street regeneration projects in areas of London where future investment could unlock the most growth potential but where bids are currently unforthcoming.

### Mayor of London

I confirm that I do not have any disclosable pecuniary interests in the proposed decision, and take the decision in compliance with the Code of Conduct for elected Members of the Authority.

)ur

The above request has my approval.

Date:

30/04/15.

### PART I - NON-CONFIDENTIAL FACTS AND ADVICE TO THE MAYOR

### **Decision required – supporting report**

### 1. Introduction and background

1.1 The Mayor has acted early and strongly to address the specific challenges faced by London's High Streets; working closely with the London boroughs and a range of organisations to guide investment and develop better management models to deliver jobs, growth and housing for the city as part of high street renewal. The Outer London Fund £50m, the Mayor's Regeneration Fund £70m (MRF/LEF), and direct investment in pilot Town Teams accompanied by a significant support offer from City Hall have led to significant economic uplift, along with wider outcomes and learnings that can be applied more broadly across London.

7 1

50

1.2 On the back of this success the GLA allocated an additional £9m in 2014/15 to further support the work of the Regeneration team in this area. The proposals set out in this paper result from a small amount of funding utilised in 2014/15 to support partners to develop better performing investment propositions and better crafted projects. The majority of the expenditure will now take place in 2015/16.

### 2. Objectives and expected outcomes

- 2.1 A series of 'High Street Conversations' took place Summer 2014 with the London boroughs and other high street stakeholders to test the prescription set out in 'The Mayor's Action For High Streets' document (launched June 2014) and help to further define the parameters for future funding ahead of the launch of the High Street Fund Prospectus September 2014.
- 2.2 The subsequent Prospectus further outlined the criteria and eligible activities for future high street investment and support from across the GLA. It invited submissions to deliver activities across 4 key themes
  - Proactive stewardship to establish local partnerships to encourage changes and to develop high street strategies.
  - Stimulating activity to improve the look and feel of places, make them more welcoming including support for events and physical improvements.
  - Occupying empty space to help bring back a high street bustle and ensure a diverse and desirable range of uses.
  - Accommodating growth to boost the high streets role in supporting and shaping development and town centre intensification.
- 2.3 Proposals were also expected to demonstrate good levels of leverage and match funding, deliverability, scope for economic uplift, ways to boost place shaping capacity and high levels of collaboration and support.
- 2.4 Interventions were to focus on a 'blend' of activities focussed around a place to maximise cross cutting outcomes and impact. Projects were sought that could experiment and prototype new ideas and innovations. In particular and in line with newly revised London Plan policy, proposals were sought that could accommodate growth by promoting the diversification and intensification of the high street and town centres.
- 2.5 An open call was been designed to invite project proposals and to build a 'pipeline' of projects with the intention of securing further funding from 2015/16 onwards through any combination of LEP and European funding, private sector sponsorship, partnership input and other external funding.

The programme is therefore designed to be an ideal vehicle to 'fold in' additional funding and initiatives.

- 2.6 The open call included the launch of the Mayor's High Streets Space Hive online platform which has been developed to facilitate smaller applications of up to £20,000 from a much wider pool of would-be delivery partners including the voluntary sector, community groups, traders associations and schools. Borough led partnerships were invited to access funds of up to £2m per location via a traditional application process. Boroughs were asked to ensure their applications were scalable and divisible.
- 2.7 A total funding request of £24.8m (£21.4m capital and £3.4m revenue) was received by the 1st December 2014 deadline. This included 81 applications via the Mayor's Space Hive (accounting for £1.4m) and 56 larger applications from partnerships led by Boroughs (accounting for £23.4m). In terms of applications a good geographic spread was achieved with at least one application from within each of the London boroughs and the City of London. This overall request was accompanied by commitments to £35,154,913 in match funding.

Funds	Capital	Revenue	Total	Match
requested	£m	£m	£m	£m
Smaller 20,000	1.100	0.300	1.400	3.200
Larger	20.300	3.100	23.400	32.000
Total	21.400	3.400	24.800	35.200

### Table 1. Funds requested

- 2.8 The Regeneration team carried out a validation and appraisal process involving key experts from various other GLA teams (Housing and Land, Environment, Culture, EPBU, Transport/TfL) to determine the best performing project proposals against a range of preset criteria. GLA Economics were also asked to assess bid information related to value for money / cost benefit and economic uplift.
- 2.9 The validation and appraisal process took just over two weeks. The results were compiled, mapped and presented to a moderation panel December 16th, further revised and recommended to the Mayor's Advisor on Aviation and Crossrail (Advisory lead for the High Street Fund) December 18th.
- 2.10 Following the moderation panel and advisor input, recommendations were made to and endorsed by the Investment Programme Board (IPB) in January 2015. These were
  - 1) to fund the highest ranking 17 Space Hive projects to a total of £314,452 (comprised of £210,042 capital and £104,410 revenue.
  - 2) A further £285,548 (£235,548 capital and £50,000 revenue) is to be set aside for at least one further wave of applications.
  - 3) to fund 25 projects (see appendix 2), to a total of £7,713,000 (£7,001,225 capital and £711,775 revenue).
  - 2.11 As initially proposed, the 25 recommended large projects would deliver a significant level of outputs, outcomes and match funding. The re-scoping of the projects as part of the preferred option has resulted in an inevitable reduction in outputs although higher numbers of outputs have been confirmed by delivery partners than those reported as estimates to IPB in January 2015.

Output Measure	Application	IPB Jan Estimated	Confirmed following rescoping
Jobs created or safeguarded	672	456	543
Number of businesses supported	1,207	948	920
Number of town centre/high street associations supported	51	23	30
Number of events held	399	332	264
Area of public realm improved (m2)	38,273	12,533	34,555
Number of buildings/ shop fronts improved	173	99	141
Increase in footfall (%) average across 19 projects	14	10	5
Decrease in vacancy rate (%) average across 12 projects	8	8	4
Area of vacant floor space re-occupied (m2)	16,244	13,723	24,446
Area of new or improved commercial space or work space (m2)	24,702	20,426	15,603
New start-up businesses (number)	122	116	111
Apprenticeships (number)	56	49	52

### Table 4. Output measures

- 2.12 There have been a number of good examples of delivery of High Street investment across earlier rounds OLF and MRF/LEF programmes. Independent interim evaluations have indicated many positive signs regarding programme strengths. It has been widely found that there is strong support for High Street investment and that it can lead to some significant results.
- 2.13 All the lessons learned via the programme and its evaluations have been incorporated into a publication 'Learning From London's High Streets' and widely disseminated via the GLA administered High Street Network.
- 2.14 IPB therefore endorsed the proposal that the GLA continue to evaluate and share knowledge in this way utilising £40,000 for this round of the High Street Fund.
- 2.15 During the moderation panel (December 16th) it was noted that there was a lack of strong proposals from certain areas of London and in particular from some areas that have strong growth potential. IPB therefore endorsed the proposal that the GLA's Regeneration team spend their time with these boroughs in these areas to develop a series of project proposals in readiness for future rounds of funding and other funding streams. Furthermore IPB suggested that the OLF capital underspend, currently projected at £400,000, be utilised for these purposes and in particular directed where future investment could unlock the most growth potential. As the nature of this investment is likely to be predominantly revenue, this was subject to the requisite availability of revenue funds, which was confirmed as part of the Mayor's Final Budget for 2015-16 on 27 February 2015.

### 3. Equality comments

- 3.1 All projects will be developed and delivered in compliance with relevant Codes of Practice and in line with the requirements of the public sector equality duty to ensure that the following issues have been considered
  - Design (project) Proposals: All design (project) proposals will be assessed in terms of accessibility to ensure we minimise disadvantages suffered by people who share a protected characteristic. age, disability, gender reassignment, pregnancy and maternity, race, gender, religion or belief, sexual orientation

- ii) Documents and publications: all documents produced will comply with Mayor of London branding guidelines, it being based on guidance from the Royal National Institute of Blind People. Where possible accessible formats will be available.
- iii) Events: all events will be open to all and, where possible, we will encourage people who share a protected characteristic to participate in any activity in which their participation is disproportionately low.
- 3.2 The Boroughs receiving High Street funds will already share the public sector equality duty. This will be stipulated in grant agreement to ensure delegation is clear. Non Borough organisations won't automatically be under this duty but will be provided with guidance to ensure they meet these requirements.

### 4. Other considerations

### key risks and issues

- 4.1 Delivery While time frames are compressed significant resources are being directed toward delivery from across the regeneration team –including oversight of differing work streams by 3 members of the regeneration management team. This will be managed by establishing clear client, steering and review group structure to oversee development of the work. Delivery and performance will be managed through existing established structure in the Regeneration team, rated 'substantial' through the GLA's audit process.
- 4.2 Due to the novel approach taken to solicit applications from the community and voluntary sector via the Space Hive Online platform there is a risk around the bidders' assessment of capital and revenue spend. In the case of voluntary and community organisations in particular it is possible that some of the spend proposed as capital is, in fact, revenue. Therefore, to manage this risk, a further sum of £50,000 has been included within the revenue Space Hive allocation, with a corresponding reduction in the capital expenditure.

### links to Mayoral strategies and priorities

4.3 The High Street fund has been developed to support London Plan policies with regard to Town Centres, Retail, Lifetime neighbourhoods, public realm and urban design. It also supports the delivery of the Mayor's Economic development strategy by supporting public and private bodies to work in partnership to support SMEs to flourish.

### impact assessments and consultations.

4.4 A series of 'High Street Conversations' took place Summer 2014 with the London boroughs and other high street stakeholders to test the prescription set out in 'The Mayor's Action For High Streets' and help to further define the parameters for future funding ahead of the launch of the High Street Fund Prospectus September 2014.

### 5. Financial comments

5.1 Approval is sought for expenditure of £8,353,000 (£7,446,815 capital and £866,185 revenue) from the Mayor's High Street Fund and £400,000 of revenue OLF funds to establish a commissioning fund. The Mayor's Final Budget for 2015-16 approved the reduction of the available Regeneration capital funding by £753,000 and a corresponding increase of £753,000 in the available Regeneration revenue funding to resource the additional High Streets (£353,000) and OLF (£400,000) revenue expenditure, as detailed in this decision.

### 6. Legal comments

- 6.1 The foregoing sections of this report indicate that:
  - 6.1.1 the decisions requested of the Mayor fall within the statutory powers, acting on behalf of the Authority, to do anything which is facilitative of or conducive or incidental to the promotion of economic development and wealth creation in Greater London; and
  - 6.1.2 in formulating the proposals in respect of which a decision is sought officers have complied with the Authority's related statutory duties to:
    - (a) pay due regard to the principle that there should be equality of opportunity for all people;
    - (b) consider how the proposals will promote the improvement of health of persons, health inequalities betweens persons and to contribute towards the achievement of sustainable development in the United Kingdom; and
    - (c) consult with appropriate bodies.
- 6.2 Officers have indicated in sections 1 to 4 of this report that the contribution of funding to the proposed recipients will amount to the provision of funding and not a payment for services to be provided and must ensure that the proposed funding is disbursed in a fair and transparent manner in accordance with the Authority's Contracts and Funding Code and grant funding agreements are put in place between and executed by the Authority and recipients before any commitment to the funding is made.
- 6.3 Officers must also ensure that ensure that any services or supplies required for delivery are procured by Transport for London Procurement who will determine the detail of the procurement strategy to be adopted in accordance with the GLA's Contracts and Funding Code and appropriate contract documentation is put in place and executed by the Authority and contractors before the commencement of any such supplies or services.
- 6,4 The Mayor may delegate the exercise of the GLA'S statutory power to undertake activity considered facilitative of or conducive or incidental to the promotion of economic development and wealth creation in Greater London to the Executive Director of Development Enterprise and Environment if so he chooses.
- 6.5 Officers must ensure that, to the extent that any funds are to be distributed other than through a competitive process, such distribution is undertaken in a State aid compliant way.

### 7. Investment & Performance Board

### Minutes:

- 10.1The Board received a report which sought in principle approval for the allocation of<br/>£8,353,000 from the High Street Fund and the related preparation of 42 grant awards to<br/>21 London boroughs and 15 voluntary sector organisations, charities and traders' groups.
- 10.2 Officers explained that the proposals would require additional revenue budget of up to £753,185 and a corresponding reduction in the requirement for capital funds. The Executive Director Development, Enterprise and Environment explained that £11m of revenue resource was expected to become available in exchange for an equal amount of capital funding. After discussion, it was agreed that the revenue funding requirement set

out for this programme would be made available through the potential £11m with all remaining funding being held centrally.

### 10.3 DECISIONS:

a) That the recommendations as set out in the report be agreed; and
b) That the request to swap £753,185 of capital funding for revenue be agreed subject to confirmation of the revenue resource being made available.

### 8. Planned delivery approach and next steps

8.1 The next steps following consideration/in-principle approval by IPB are summarised below:

Activity	Timeline
MD Sign off	w/c 16.03.15
DD Sign off (Programme wide)	w/c 21.03.15
Delivery Start Date [for project proposals]	01.04.15
Delivery End Date [for project proposals]	31.03.16
Project Closure: [for project proposals]	31.06.16
Final evaluation start and finish (self/external) [delete as applicable]:	31.09.16

### Appendices and supporting papers:

Appendix 1- SpaceHive project list

Appendix 2- Large projects (Option1)

Appendix 3- Successful applications map

Appendix 4- SpaceHive project descriptions

### Public access to information

Information in this form (Part 1) is subject to the Freedom of Information Act 2000 (FOI Act) and will be made available on the GLA website within one working day of approval.

If immediate publication risks compromising the implementation of the decision (for example, to complete a procurement process), it can be deferred until a specific date. Deferral periods should be kept to the shortest length strictly necessary. **Note**: This form (Part 1) will either be published within one working day after approval <u>or</u> on the defer date.

### Part 1 Deferral:

Is the publication of Part 1 of this approval to be deferred? NO

If YES, for what reason:

Until what date: (a date is required if deferring)

**Part 2 Confidentiality**: Only the facts or advice considered to be exempt from disclosure under the FOI Act should be in the separate Part 2 form, together with the legal rationale for non-publication.

### Is there a part 2 form – NO

ORIGINATING OFFICER DECLARATION:	Drafting officer to confirm the following (√)
Drafting officer:	
Jamie Dean has drafted this report in accordance with GLA procedures and confirms the following have been consulted on the final decision.	✓
Assistant Director/Head of Service:	
Debbie Jackson has reviewed the documentation and is satisfied for it to be referred to the Sponsoring Director for approval.	✓
Sponsoring Director:	
Fiona Fletcher-Smith has reviewed the request and is satisfied it is correct and consistent with the Mayor's plans and priorities.	✓
Advice:	
The Finance and Legal teams have commented on this proposal.	✓

### **EXECUTIVE DIRECTOR, RESOURCES:**

MARTIN CLARKE

I confirm that financial and legal implications have been appropriately considered in the preparation of this report. (

The 'Do Up Our Alley' project aims to improve alleyways off Beckenham high street, and is cementing the working partnership of the one year old Town Centre Team, giving them focus. It sits alongside the larger TfL investment going on alongside in the next year, designed by East

The project will deliver direct public realm improvements that would otherwise not be funded, enhancing a feeling of security and safety and celebrating the unique character of Beckenham's winding High Street full of alleyways. It will also increase the viability of vacant premises above and behind the High Street accessed via the alleyways. The project has the full support of Bromley Council and is being undertaken to complement a TfL Major Improvement Scheme, which follows on next year. There is a clear commitment and capacity to deliver this project. The Town Centre Team will undertake much of project administration in-kind. The team will also seek further financial and in-kind contributions to maximize the scope of the project and achieve great value for money.

Funding is sought to remodel the front spaces and High Street presence of the 'Triangle - Creative hub' to improve access and interior visibility, improve the visitor experience, provides increased areas of affordable, accessible workspace and provide additional revenue streams to artists and small business start-ups. The project aims to create and retain 50 jobs for creative start-ups, support 50-60 plus construction & fabrication jobs (connecting a network of Hackney based makers and creative), train 50 NEETs annually, employ 2-3 apprentices, provide better, affordable work, hire & presentation space, ensure SPACE & artists sustainability through new revenue streams, bring creative opportunities to more people.

Proposal description

Create a social enterprise Café on ground floor of existing Centrepoint Resource Centre in Soho. Café will offer work experience to homeless young people aged 16-25, providing them with the skills and experience to find employment locally and contribute to local growth. Building works will make the ground floor more welcoming and accessible whilst an internal fit out and some new equipment would be purchased. Part of the project will be to develop an associated brand to market the initiative.

Capital	£9,352	Revenue	£5,000	Capital	£9,352	Revenue	£5,000

course of a year. The project includes the design and build of a moveable set which will be rebuilt to reoccupy spaces on the high street. The new programme follows the success of RCAP's recent Pie Eyed Performance Festival, held in a large vacant unit in the Brewery shopping centre. The group have significant experience in negotiating leases with landlords, running very successful events and recently became a CIC.

The project meets all of the fund objectives and supports the Council's wider plans for Romford's high street. The group have assessed the successes of previous projects and identified comedy as the most accessible for a wide range of high street users. RCAP have the full support of the Council who are providing match funding to pay for the project manager role. A very good project encouraging alternative and innovative uses of high street spaces. The project should be self-sustaining by year two and will bring a new and improved evening offer to Romford.

### Outputs as proposed

12 events held

12 vacant spaces reoccupied

project in the area. The organisations will capitalise on 5 years of community engagement, recruiting 50 more volunteer activists and train 3 new Tour Guides to lead "Surbiton Fact & Fiction" trails. Community Brain will also deliver a piece of research which will map the requirements of local start-up businesses so this can be fed into the council's plans for Surbiton high street. UCL will also partner on this project to deliver a study exploring local behaviour, as part of Anthropology of the High Street. A clear aim of the project will be to make 'The Museum of Futures' a permanent feature in Surbiton and a strategy for seeking ongoing funding during the project will also take place.

### Outputs as proposed

Numerical quantities are to be confirmed and worked through with Community Brain. The outputs and outcomes described in the bid will include;

Business support

Delivery of events

Re-occupation of vacant floor space and creation of new workspace

.

may be a proportional reduction to the amount of business support and trader engagement. This would have minimal, direct impact on the following outputs: businesses supported start-up businesses and volunteers, and possible secondary impact on other outputs. And we would seek a greater contribution from applicant to address the shortfall.

Proposal description

The Blackhorse Workshop proposal builds on the success of the modestly funded (£45k) OLF pilot project and addresses capacity to meet untapped demand. It retains strong support from LB Waltham forest with revenue match funding, committed use of the existing LBWF-owned site until January 2018 and guarantee of a follow-on site with associated relocation costs.

After 10 months of operation, the proposal ambitiously increases the outreach and impact of the project, with increased outputs/outcomes, and measures to ensure future self-sufficiency. The project includes:

- A. measures to increase efficiency and profitability of existing space (building and yard);
- B. provision of new space and facilities (new demountable building in yard);
- C. additional programming and associated resource (fully LBWF funded);
- D. improving public realm of approach path (fully LBWF funded).

This is not a proposal for 'business-as-usual'; rather it sets out ambitious growth and new space with associated new outputs and outcomes.

Proposal description

LB Waltham Forest's proposal for Walthamstow would fund a series of work strands that address: **Cultural provision:** collaboration with Soho Theatre to refit a LBWF-owned building for cultural provision and local engagement re. Granada cinema site redevelopment; business support for cultural institutions and way finding to leading cultural attractions.

**Housing provision:** 50 planning permissions for live/work 'back-alley' development plots, delivery of 2 pilot live/work properties, supporting public realm.

**Strengthening market and retail provision:** Additional market infrastructure to support new night time market, business support and marketing to support increased market activity and shop front improvements.

**Creative workspace provision:** new retail space within LBWF owned building and new enterprise incubator space.

The proposal has a very strong fit with High Street Fund objectives, specifically accommodating growth and stimulating activity. The proposal is highly place-specific, devised on evidence of demand for greater cultural and creative industry provision in Walthamstow. The project would facilitate collaboration with Soho Theatre and

develop an innovative housing opportunity for high st	reet places across London.
Outputs as proposed	
Number of businesses supported	65
Area of public realm improved (m2)	90
, , , , , ,	

### Fundable project description

The re-scoped project retains the work streams with most significant outputs and outcomes, and excludes three capital proposals that greatly decrease project costs: way finding, shop front improvements and the majority of proposed public realm, with a reduction in scope of revenue proposals: business support elements and the development of 50 planning permissions for live/work units.

GLA will work with LBWF to seek alternative funding or future delivery plans. There is potential to collaborate with Housing and Land and seek associated funding (e.g. Custom Build Fund).

Proposed fundable project would have some impact on stated outputs. e.g. reduction of the area of public realm improved and number of shop fronts improved; and a possible reduction in the number of businesses supported.

Ambitious project that focuses on 4 Wembley Fringe areas and delivery of pan-Wembley digital high street initiative to promote local businesses (includes website, free Wi-Fi and IBeacon, to enable near and in-store promotions via a phone app). **Wembley Park Drive**: 45 businesses supported (building on previous initiatives), BID exploration, 30 buildings improved and artworks to gable-ends; **Wembley Triangle**: occupation of 10 empty units, 15 businesses accommodated and supported, 100 SMEs supported through 'demand-led' support, 15 buildings improved; **Wembley Central**: rate relief to secure meanwhile use of Chesterfield House for community and commercial use; **Ealing Road**: 10 buildings improved and artworks to gable-ends, policy changes to increase street trading, 4 high street events, creation of shared surface to increase public space, BID development. The project could have a significant impact in attracting footfall from Wembley Stadium and nearby growth areas. Match funding is 56% of TPV, formed of £535k GLA fam cap, £276.5k GLA fam rev, £210k council cap, £300k council rev.

### Fundable project description

The re-scoped project will focus on direct support and training to SME's and support for start-ups, rather than predominantly physical improvements to the high street. It is suggested however that very targeted physical improvements that make a significant improvement to the economy of the high street are supported (recommendation to refocus public realm improvements on Wembley Triangle connectivity to Wembley Stadium and the London Designer Outlet).

Number of businesses supported	15	Number of start-up businesses	1
Number of town centre associations supported	T	Town Centre Strategies supported	1
Number of events held	2	Increase in satisfaction	10%

**Fundable project description** The rescoped project will focus more on activities that can make a significant impact in the area (i.e. supporting start-up businesses) in line with the Entrepreneurial Barnet strategy, avoiding under-funding projects that cannot fully be realised with the modest capital budget (i.e. a programme of public realm and shop front improvements). It will focus more on giving local entrepreneurs a greater presence on the high street, therefore helping to address high deprivation rates and associated anti-social behaviour (in line with GLA Economics comments).

Borough Havering		Total sco	re (X/100)	83			
Applicant		Havering		Economics score (X/5)		2

A comprehensive package of investment and works including:

1. an innovative stewardship model to tackle the issue of vacant units on South Street. The borough will take on short leases of high street properties and carry out light refurbishment work to these units, running an open call to install pop up tenants. A landlords forum will also be established ( $\pounds$ 130k);

2. the borough will work with local group Romford Contemporary Arts Programme CIC and the local Construction

College to create pop up platforms on the high street (£30k) tying activities in with market days; 3. plans for new public art work and building improvements to highlight heritage features and improve way finding in the town centre (£140k). The project proposes an incentives package for landlords so that tenant mix and lengths can be better

coordinated. Match funding will be spent on complimentary street scene improvements and changes to the market. The project will encourage visitors to 'look again' at Romford, offering more independent retail and cultural activity on the high street, creating a clearer, cleaner and creative route from the station along the high street to the market and new housing sites.

### Fundable project description

The comprehensive package of investment and works will include a stewardship model for high street units, the establishment of a landlords forum, designed pop up platforms for events on the high street and new public art work and way finding. The rescoped project has removed funding for the building improvement works as the seven proposed buildings hadn't yet been located for the works and posed a push on programme and less innovative. Outcomes will be affected by potential reduction in number of buildings being improved, number of events held and footfall rates.

Proposal	description						

On the site of the Ladywell Leisure Centre, on Lewisham High Street in Ladywell, LB Lewisham are proposing to locate a £4.2m housing development that can also be relocated to other sites in the borough – it will provide a temporary solution while long term plans are developed. The building will provide 24 housing units on the upper floors and an 880m2 'innovation hub' on the ground floor. The hub will provide space for business incubation and community use. The High Street Fund will pay to develop further the initial feasibility study for the innovation hub (£20k) and for fit out costs (£515k). The new building will bring an empty site back into use, bring new non-retail use to the high street, provide additional housing, provide a testing facility for potential permanent uses on the site and develop a model that can be reused on a number of other key sites in the borough. As well as leading to short term positive outputs the High Street Fund project will support longer term strategic plans to intensify the corridor from Lewisham to Catford.

Outputs as proposed

Fundable project description

Increase in business turnover (£)

Apprenticeships (number)

Increase in footfall (%)

Elements considered to deliver the greater outputs with good deliverability comprise the investment in local workspace, the culture training & café facility, services infrastructure to support local businesses, trader development trust and way finding. Re-scoped project omits contribution to subterranean retail, market shelter, while reducing contribution to other elements. The prioritised interventions support the original ambition to deliver coordinated and strategic development of the local economy for maximum value and growth potential. Outputs would naturally reduce, but jobs created and businesses supported would be the most protected. Match would likely reduce but we anticipate not proportionately— to be negotiated with Borough.

5

50,000

The project aims to provide short term deliverables within a larger strategic project.

This bid is made up of the following components:

-deliver the first phase of the market strategy, with a major renewal of the public realm in Electric Avenue. -create 6 new signage/entrance features and 3 maps at the gateways to each of the main markets (Inc. Electric Ave.). HSF would also enable basic refurbishment of the public toilet block on Pope's Road

-install hardware to create free Wi-Fi zones throughout the street and covered markets area; support local traders in accepting electronic payments through provision of handheld payment devices, alongside training.

-provide a Brixton  $\pounds$  cash machine, increasing access to the popular local currency, which in turn supports the local supply chain. This would be a world first for a local currency.

-expand the proposed POP Brixton meanwhile project. Funds would be used to enclose and fit out a space in the scheme previously designed to be an outdoor workshop type area. This would create an 180sqm managed

workspace to house the Impact Hub Brixton. POP Brixton will run to at least October 2017, when the site will be required for re-development. As the structure is demountable it would then be re-used elsewhere. -run a series of SME/start up support programmes in partnership with the Impact Hub Brixton

Outputs as proposed		
Jobs created or safeguarded	50	
Number of businesses supported	70	
Number of town centre/high street associations support	ed 1	
Number of events held	50	
Area of public realm improved (m2)	70	
New start-up businesses (number)	4	
Apprenticeships	16	
Area of vacant floor space re-occupied (m2)	1699	
Fundable project description		

The project elements related to the market strategy and improvements, to Electric Avenue, Station Approach and Atlantic Road, Wi-Fi provision, Brixton  $\pounds$  cash machine would be taken forward in the proposed reduced project. It is proposed that the relocation of the impact hub be removed from the project. The reason for this is that the timetable for relocation is tied to the wider town hall project, which is uncertain and may not happen in the timeframes of the high street fund.

The detail of the separation of the town hall related elements will need to be worked through with the borough; it will not affect the public realm outputs but may reduce job outputs and area of vacant space re-occupied.

Fund ongoing delivery of Camden Collective project to build on established platform and momentum initiated through MRF investment and assist CTU in developing a long-term, sustainable future for what was a highly successful project in terms of outputs and value for money. A reduced grant of £150,000 represents approximately 40% of the HSF request to deliver the outputs described above by March 2016 Therefore, re-scoped project could be expected to deliver at least 40% of those outputs. Match from CTU would likely remain at £190K. CTU have track record of delivery and GLA economic scoring does not take into account short term outputs are not related to the total HSF request made.

Borough		Ealing		Total scor	e (X/100)	80	
Applicant	;	Ealing		Economic	s score (X/5)	3	
Total HSP	request	£695,000		Total grai	nt proposed	£395,000	
Capital	£695,000	Revenue	£0	Capital	£395,000	Revenue	£0
	description	Haranda		<u> </u>			

The proposal includes a public realm strategy to improve east-west connections, the creation of more space for events, and upgrades to the town square to enable better running of the market; a pop-up shop, BID and business support programme; 4 art and culture events; and a fundraising plan to support future events and promotions and a town centre marketing plan. The main aim of the project is to enhance the distinctiveness of the area. It builds on previous work and will set out a strategy for future improvements. 50% project match is formed of 480k cap/205k rev council and 10k rev non-council.

Number of businesses supported	25	Area of public realm improved (m2)	1000
Number of town centre associations supported	2	Number of buildings/shop fronts improved	10
Number of events held	4	Vacant units activated	1

The re-scoped project will make more of the opportunity presented by high vacancy rates and relatively high level of deprivation and self-employment, supporting more businesses onto the high street, potentially creating more jobs in the area. This could include the development of the pop-up shop project into a more long-term and extensive programme. The scope of public realm improvements will be reduced to in light of budget reductions and the high risk of timely delivery.

		tment Manage					
Borough		-		Total scor	re (X/100)	80	
Applicant		British Prop Federation	erty	Economic	s score (X/5)	3	
Total HSF	; request	£75,000		Total grai	nt proposed	£25,000	
Capital	£0	Revenue	£75,000	Capital	£0	Revenue	£25,000

The project would test the "Town Centre Investment Management" (TCIM) concept of establishing an asset management approach to address fundamental issues affecting high streets. The concept has been developed by the CLG sponsored Future High Streets Forum Task & Finish Group, with the British Property Federation as secretariat.

The concept addresses the fragmented individual ownership of high street property, and the failure to co-ordinate business tenants, to create a more attractive, desirable and diverse mix of uses to improve town centre performance and the visitor experience overall, in the way that shopping centres can through singular ownership and investment.

The project expects to attract match funding from CLG to develop the basic model. HSF would test how the TCIM concept could be implemented in 3 London town centres (Brentford, Barking, and Catford), and understand what the limitations, barriers, costs and benefits might be.

### Outputs as proposed

Number of places where application of TCIM concept would be explored = 3 places

### Fundable project description

The re-scoped project would allow the TCIM concept would be explored in 1 place as a pilot (to be determined). There is a potential for additional funding from the Outer London Commission in the next financial year, to focus further on the opportunity for additional mixed-use housing development, as part of consolidating fragmented ownership. Match funding from CLG, and pilot town centres outside London, are unlikely to be affected.

Rescoped project has removed funding for the part time onsite manager role although GLA will push for this to be funded from elsewhere, potentially from the building work budget, following more detailed value engineering. Output for number of events held may need to be reduced.

### Fundable project description

Re-scoped budget would support project 1/2 only - Interventions developing opportunities for employment / training / workspace provision linked to an online platform. This project would offer maximum value in terms of additional outputs to support the area using capital funds. There would be a reduction in outputs as proposed but we think Westway Trust may push on with a number of these regardless so match is likely to remain unaffected but the GLA grant will focus on outputs we consider most valuable in unlocking the wider regeneration scheme, creating jobs and levering attracting additional investment whilst concentrating on deliverable element and allowing GLA to support the trust with scoping future projects.
