

GREATER LONDON AUTHORITY

[REDACTED]
(By email)

Our Ref: MGLA090920-3655

28 September 2020

Dear [REDACTED]

Thank you for your request for information which the GLA received on 8 September 2020. Your request has been considered under the Freedom of Information Act 2000.

You requested:

Symptoms of Infected COVID-19 Patients Dataset
Could you send me a dataset much similar to this example, please?
I need to do Predictive Modelling - likelihood of Patients [surviving/ dying] OR
[positive/ negative test] on COVID-19

Our response:

The GLA does not hold data on patient symptoms. I would recommend getting in touch with Public Health England in the first instance.

We publish a range of data or research from various sources relating to COVID which is available to download from this part of the site: <https://data.london.gov.uk/topic/covid-19>

You may find the following useful:

The ONS analysis of cause of death from death certificates.
<https://www.ons.gov.uk/peoplepopulationandcommunity/healthandsocialcare/causesofdeath>

A report by PHE on disproportionality of deaths - the [COVID-19: review of disparities in risks and outcomes](#) report. This work was led by the PHE Epidemiology and Intelligence teams. It is a descriptive review based on the latest surveillance data available to PHE and from links to wider health data sets. The review looked at different factors including: age and sex; where people live; deprivation; ethnicity; people's occupation; and care home residence. The review showed that there is an association between belonging to some ethnic groups and the likelihood of testing positive and dying with COVID-19.

If you have any further questions relating to this matter, please contact me, quoting the reference MGLA090920-3655.

Yours sincerely

Information Governance Officer

If you are unhappy with the way the GLA has handled your request, you may complain using the GLA's FOI complaints and internal review procedure, available at:
