

## Reconnections 2014-2018 - London overall

Figures below are based on individual reconnection events. Some people may have been reconnected more than once in a given year and thus be counted multiple times.

Figures for 2018 are based on the partial year, up to 04/11/18.

Some reconnections to other London boroughs may have been recorded as accommodation stays rather than reconnections, and therefore be missing from these figures.
