

Dear [REDACTED]

Thank you for your request for information. Transport for London (TfL) have produced the dataset in question. I've checked with them to see if they hold the information to be able to respond to your request before referring you to them however they have informed me that currently they are unable to show taxi and private hire vehicles separately in their database ACCSTATS. The vehicle category designated by the Department for Transport combines taxi and private hire vehicles into one category shown as Taxi.

During 2007, 2008 and part of 2009 the Metropolitan Police introduced a different collision recording database that enabled the three vehicle types 06 Private Hire - Licensed, 07 Private Hire - Unlicensed and 08 - Taxi to be recorded, however after these dates the newer system was withdrawn and the previous one reinstated. Where recorded these are shown in the 2007, 2008 and 2009 vehicle data extract files.

The Metropolitan Police have introduced a new recording application for road traffic collisions and TfL have requested that taxi and private hire be recorded separately (though they will still be combined in the national data set), they hope to show these two vehicle types in the future.

Also, please note that information on pedestrian casualties can be found here;

<https://tfl.gov.uk/corporate/publications-and-reports/road-safety>

under factsheets and annual report tables, the latest 2016 annual report tables has table 1.4 that should be useful. 2017 data will be uploaded later this year.

If you have any further queries, you may wish to contact the TfL FOI team at [foi@tfl.gov.uk](mailto:foi@tfl.gov.uk) or the MPS via <https://www.met.police.uk/foi-ai/accessing-information/>

Yours sincerely

Paul Robinson  
Information Governance Officer

If you are unhappy with the way the GLA has handled your request, you may complain using the GLA's FOI complaints and internal review procedure, available at:
