

## ANNEX FOUR

# HOUSING PROVISION STATISTICS

A4.1 For the avoidance of doubt, this annex forms part of the London Plan and therefore of the statutory development plan.

### **Disaggregated Housing Monitoring Benchmarks 2011/12 – 2020/21**

A4.2 To assist the London Boroughs in monitoring their housing provision targets, Table A4.1 provides a disaggregation of the target by components of supply.

A4.3 Conventional housing is made up of large site and small site components that were identified in the 2009 Strategic Housing Land Availability Assessment and Housing Capacity Study (SHLAA/HCS). The non-self contained element is derived through an analysis of past trends and pipeline developments. Vacant dwellings are based on targets to reduce long-term vacant stock in each borough. More information about each of these components of supply can be found in the report of study of the 2009 Strategic Housing Land Availability Assessment and Housing Capacity Study.

A4.4 To assist the boroughs in the preparation of their land supply and housing trajectories beyond 2020/21, boroughs should roll forward the annual targets in Table 3.1 in line with Policy 3.3. The Mayor commits to revising the housing targets by 2015/16.
