

Response times

Nov 18 - April 19

Protective Marking	OFFICIAL
Suitable for Publication Scheme	Yes
Ad-Hoc Reference Number	16248
FOIA/MOPAC Ref Number	0
Summary	Response times for I, S and E calls that originated as 999 calls
Creating Branch / Directorate	MetHQ - Information and Insight
Date Created	17/05/19
Review Date	16/05/20

This report uses LIVE DATA extracted from: CRIS

The data in this report reflects live data which may be subject to small changes over time

Police forces in the United Kingdom are routinely required to provide crime statistics to government bodies and the recording criteria is set nationally. However, the systems used for recording these figures are not generic, nor are the procedures used locally in capturing the crime data. It should be noted that for these reasons this force's response to your questions should not be used for comparison purposes with any other response you may receive.

Notes

Data is from CAD

Extreme outliers have been checked and removed.

E calls include appointments

Police forces in the United Kingdom are routinely required to provide crime statistics to government bodies and the recording criteria is set nationally. However, the systems used for recording these figures are not generic, nor are the procedures used locally in capturing the crime data. It should be noted that for these reasons this force's response to your questions should not be used for comparison purposes with any other response you may receive.

WORKFORCE DATA REPORT

Data for end of March 2019

Management Information Summary
Produced by Strategic Workforce Planning
Data From PSOP

The information contained within this document, reflects the data as recorded on the MPS Corporate HR database - PSOP. The information held on PSOP is entered and maintained centrally, locally and by the individuals themselves and is therefore reliant on data being correctly entered onto the system.

<u>Loughborough University's Fatigue Survey of London's Bus Drivers (1)</u>

Question No: 2019/8808

Caroline Pidgeon

Further to your response to Question 2019/4039 please provide a copy of the agreed terms of reference, budget and milestones for the fatigue survey of London's bus drivers.

Survey method (from proposal)

d. Quantitative Stream

i. TASK 4: DRIVER SURVEY

Drivers will be invited to complete an online survey, in order to identify factors leading to driver fatigue/sleepiness. All London bus providers will be invited to participate and asked to facilitate distribution of questionnaires to their drivers. It is the applicant's preference to invite drivers to participate directly, participation rates are often higher if the survey is not perceived to come from the employer. This task will address research questions 1 and 2.

<u>Method:</u> Online survey. The core questions are those translated from the Swedish 35 item questionnaire designed and used to measure fatigue in Swedish bus drivers (Anund et al 2016).

<u>Study questions</u>: How prevalent is severe driver sleepiness? How do background factors such as age, gender, socioeconomic factors, but also type of employment contribute to driver fatigue/sleepiness? What working and health conditions are associated with severe driver sleepiness? Bus drivers will also rate their stress levels related to their daily work but also their overall stress during the last 3 months on a 10 point scale from low levels (1) to high levels (10).

Participants: All drivers working for London bus companies will be invited to participate.

<u>Procedure:</u> Drivers will be sent a link to an online questionnaire, and invited to complete the survey questions. Most questions require response on a scale e.g. Never, Seldom, Sometimes, Mostly, Always. Questions will cover five sleep indexes: Disturbed sleep, Sleepiness, Fatigue, Impaired waking and Sleep Apnoea. Multiple logistic regression analysis will be used to identify an optimal model to discriminate between drivers who self-report regularly having to fight sleepiness to stay awake while driving the bus and those who do not. In addition drivers will be asked about commuting, shift swapping and overtime.

<u>Outcomes</u>: Identification of the risk factors which are statistically most associated with driver fatigue/sleepiness. Targeting solutions to the risk factors which are specifically relevant for London bus drivers increases the strength of benefit for a solution, this information will inform Task 6.

Call-ins

Question No: 2019/9265

Nicky Gavron

On schemes that you have called in and determined since coming to office, could you provide a breakdown of the total number of units by bedroom-size and tenure, and the changes to each that have been secured following the call-in.

Appendix

Breakdown of housing numbers by application scheme, before and after call-in

Total – approved schemes

	1 bed		2 bed	2 bed			4/5 bed		total	
	before	after	before	after	before	after	before	after	before	after
affordable/social	34	115	118	163	47	65	0	0	199	343
rent
