

# MAYOR OF LONDON

## Local Energy Accelerator – projects supported to July 2023

Beneficiary Name	Project Name	Type of Project	Technology
London Borough of Haringey (Alexandra Palace)	Decarbonisation planning for net zero	Decarbonisation plan	Various Renewables
Citigen (E.ON)	Network thermal modelling	Decarbonising existing heat network and expansion	Heat pumps
City of London Corporation	Barbican and Guildhall flexibility / energy storage feasibility	Energy Flex/Storage feasibility	Flexibility/Storage
Lee Valley Heat Network Operating Company Ltd (Energetik)	Route proving for extension of existing heat network to schools	Future heat network development	Energy from Waste(EfW)
East London Energy Ltd (Equans)	Heat pump feasibility at the Queen Elizabeth Olympic Park and delivery support for Stratford City Energy Centre heat recovery chillers	Decarbonising existing heat network	Heat pumps
Imperial College London (South Kensington Zero Emissions Neighbourhood)	Heat network feasibility	Future heat network development	Heat pumps
London Borough of Barking & Dagenham	Project management and commercialisation for Barking Town Centre heat network	Network development and expansion	Combined Heat and Power
London Borough of Brent	South Kilburn Heat Network technical support	Future heat network development	Heat pumps
London Borough of Camden	Somers Town Heat Network decarbonisation	Decarbonising existing heat network	Heat pumps
	Solar PV - technical and commercial works	PV feasibility	Solar PV
London Borough of Enfield	Local Area Energy Plan (LAEP) for Enfield Borough	Local Area Energy Plan	Various
London Borough of Hackney	Solar PV feasibility on Council buildings	PV feasibility	Solar PV

# MAYOR OF LONDON

## Local Energy Accelerator – projects supported to July 2023

	Woodberry Downs Heat Network review	Future heat network development	Various renewables / waste heat
	Energy masterplanning study	Future heat network development	Various renewables
London Borough of Haringey	Project Management support for multiple Heat Network projects	Future heat network development	Waste-to-energy/EfW
London Borough of Hounslow	Asset assessment and prioritisation for Hounslow's Solar PV Acceleration Programme	PV feasibility	Solar PV
London Borough of Islington	GreenSCIES heat network project management and commercial support	Future heat network development	Heat pumps / Waste heat
London Borough of Lambeth	Decarbonisation of school buildings	Public Sector Decarbonisation Scheme	Various renewables
London Borough of Lewisham	Borough-wide energy masterplan and feasibility study for decarbonising heat through extending the SELCHP heat network	Future heat network development	EfW / Heat pumps
London Borough of Southwark	Heat pump optimisation study and Brandon estate feasibility study	Decarbonising existing heat networks	Heat pumps
London Borough of Sutton	Sutton District Energy Network Heat Network Project Management & commercialisation for expansion	Future heat network development	EfW
London Borough of Tower Hamlets	Support to install Solar PV across a number of Council assets	PV installation	Solar PV
London Borough of Waltham Forest	Various low carbon heat networks support	Future heat network development	CHP
NHS England	Solar PV feasibility support across NHS sites	PV feasibility	Solar PV
OPDC	OPDC data centre waste heat network development	Future heat network development	Waste heat with heat pumps

# MAYOR OF LONDON

## Local Energy Accelerator – projects supported to July 2023

	North Acton Heat Network feasibility study	Future heat network development	Waste heat with heat pumps
Royal Borough of Greenwich	Feasibility studies for decarbonising existing communal heat networks in five buildings including Ernest Dence	Future heat network development	Various / EfW
	Greenwich Town Centre Heat Network feasibility study	Future heat network development	Various renewables
Royal Borough of Kensington and Chelsea with London Borough of Hammersmith and Fulham	Cross Borough Energy masterplanning	Future heat network development	Various
Royal Borough of Kensington and Chelsea	Notting Dale Heat Network commercialisation	Decarbonising existing heat network	Heat pumps
Royal Borough of Kingston	Project development of the Kingston District Heat Network Scheme	Decarbonising existing heat network	Waste heat/WSHPs
South London and Maudsley NHS Foundation Trust	Decarbonisation Plan	Decarbonisation plan	Various renewables
SSE	Design and development of the West Ham River Lea Heat Network, using waste heat from transformers	Future heat network development	Waste heat with heat pumps
Swan Housing	Bromley by Bow estate heat decarbonisation feasibility	Decarbonising existing heat network	Heat pumps
Switch 2	Decarbonisation feasibility of existing district heating system	Decarbonising existing heat network	Heat pumps
