Dear Mayor Khan and the London Plan team,

With reference to the London Plan consultation I wish to respond as follows.

I am responding as a supporter of the Woodland Trust because I value trees in our environment and wish to see our woodlands, green spaces and parks protected for the future and expanded to enhance life's pleasure in nature for everyone both in the countryside but, particularly, in our towns and cities. I support the amendments below suggested by The Woodland Trust as these follow my feelings and principles. One of our biggest concerns is the environment and trees play a very important role. We must strengthen our commitment to protecting green spaces as a priority above other competing concerns. Trees are going to be one of our lines of defence against the effects of air pollution. Green spaces give untold benefits to the inhabitants of London and their well being. New housing is needed but, unless absolutely necessary, these should not destroy any of our green environment. Any development should also include provision for new green spaces. We all know the benefits of a pleasant environment and it is one of primary responsibilities of the Mayoral office and the London Assembly to ensure that London remains a lovely and green place to live, work and play. Yours sincerely Christine Dillon.

In the sections listed below (in the same order as they appear in the draft London Plan).

- Paragraph 1.3.3. Recommend an addition (in CAPS) to the following sentence: "Access to green and open spaces, including waterways AND TREES, can improve health, but access varies widely across the city."
- Paragraph 3.9.5. I support the inclusion of "Protection for trees" as an issue in the amplification of potential negative impacts of large-scale basement development beneath existing buildings.
- Policy H1. Increasing housing supply. I recommend that Sentence B2)d is clarified so that "public sector owned sites" will not include woodland, parks and open spaces.
- Paragraph 4.2.9. I support the principle of "no net loss of overall green cover" as a result of small housing developments, and support "off-site provision such as new street trees" in order to achieve this principle. I recommend an addition (in CAPS) to the following sentence: "Loss of existing biodiversity OR GREEN SPACE, as a result of small housing developments, should be mitigated through measures such as the installation of green roofs, the provision of landscaping that facilitates sustainable urban drainage, or off-site provision such as new street trees in order to achieve the principle of no net loss of overall green cover. Rainwater attenuation features should be incorporated to achieve greenfield run off rates. LOSS OF ANY PUBLIC GREEN SPACE WILL BE COMPENSATED FOR WITH ALTERNATIVE ACCESSIBLE SITES."
- Policy S4. Play and informal recreation. I support section B2)d, that residential development proposals for schemes that are likely to be used by children and young people should incorporate good-quality, accessible play provision for all ages, of at least 10 square metres per child that: "incorporates trees and/or other forms of greenery".
- Policy G1. Green infrastructure. I support this policy, and subsequent narrative that mentions the important role of trees.
- Policy G5. Urban greening. I support this policy, including the recommended Urban Green Space Factor, and subsequent narrative that mentions the important role of trees. I support the inclusion of the role and weighting for woodland and trees in Table 8.2 - Urban Greening Factors. I recommend including a reference to Residential Development and Trees (Woodland Trust, 2015, [woodlandtrust.org.uk/residentialdevelopments](http://woodlandtrust.org.uk/residentialdevelopments)).
- Policy G6. Biodiversity and access to nature. I support this policy. I recommend that Sites of Metropolitan Importance and all ancient woodlands are added to the categories of planning applications that must be referred to the Mayor.
- Policy G7. Trees and woodlands. I support this policy. I recommend that Section B)1 is strengthened as follows

(amendments in CAPS): “GIVE THE STRONGEST POSSIBLE protection TO ‘veteran’ trees and ancient woodland, ESPECIALLY where these are not already part of a protected site”. I support the subsequent narrative on the role of trees, particularly paragraphs 8.71 – 8.73. I recommend referring London boroughs to guidance on ancient woodland and veteran trees: Planners’ manual for ancient woodland and veteran trees(Woodland Trust, 2017, woodlandtrust.org.uk/plannersmanual).

Please accept this my formal response to the consultation. I will look forward to hearing from you as the Plan progresses.

Yours,

Christine Dillon
