

A very brief comment:

We support the policies on Green Infrastructure and Natural Environment

However we are concerned that other objectives eg on housing will be inappropriately invoked by councils (in our case Hounslow) in agreements with developers to override these policies..

A priority should be given to getting developers to proceed where permission has already been given with associated conditions eg on appropriate scale, provision of infrastructure and meaningful level of affordability.

The London Plan should be accompanied by enforcement on boroughs to meet environmental targets and at the same time help the them where a London wide action is part of the effect eg TfL – managed roads
