I think social housing rather than affordable housing is the key. Many people cannot AFFORD affordable housing and is promoting this governments view that buying your own home is the way to go.

I also believe that restricting people to come and look for work ( unless they have a job and accommadation )will mean less rough sleepers.

Planning and building must be done so that emergency vehicles can get to every dwelling. This should be double checked and a public meeting held to discuss.

The housing MUST be built to exacting standards and new owners and renters must have proper protection against Jerry building standards without long delays in repairs.

I believe too much growth will stretch our already underfunded services and more crimes will be committed.

Too much growth will kill this city.

Look at New York and the Capital city of Mexico. At choking point because of over development pursuing MONEY ( you call it growth) instead of the well being of people.

You call this city the envy of the world?

Why so many rough sleepers? Hospital waiting? Violent crimes? Turning a blind eye on child exploitation? Food banks? !!!!!!!!!!!

Take off your rose tinted glasses. Sorry your politicians.
