It has not been possible to register when I have tried this afternoon to make comments on the website.

This is therefore a very short summary of a few key points.

Housing

1. I support a 50% affordable housing strategy for each development, unless an equivalent amount of affordable housing is provided in the borough within the same postal district.
2. The definition of affordable should relate to the average London wage.
3. Maximum amounts of prefabricated modular housing should be used on temporary and permanent sites.
4. Key worker housing should comprise at least 10% of all affordable housing and for sale housing offered to London residents first.
