Section: [N/A](#)

I welcome the commitment for using BrownField land ahead of GreenField. Land is a finite resource and recycling land for better purposes in a well planned Green Way will bring dividends.

There are already some good examples of mixed use development which work really well. Perhaps these could be publicised to demonstrate not just the business but also social benefits.

I would like to see consistency in every Local Authority submitting accurate data for the register.

Section: [N/A](#)

Green Belt is even more critical as the population grows and people need the escape from hectic lives. Many wildlife habitats and species have already disappeared and we need to halt this trend. Green Belt is the lungs of the City and will be even more needed in the future.

Page: [Policy G3 Metropolitan Open Land](#)

Section: [N/A](#)

I do not support land swaps for MOL. MOL are often playing fields or well used open spaces, which will be needed as the population grows.

Swapping and destroying wildlife/ nature habitats will do more harm than good. Wildlife species choose habitats carefully and choosing an alternative habitat is unlikely to succeed. Let's work with nature not against.

Page: [Policy G4 Local green and open space](#)

Section: [N/A](#)

Totally support the creation of a lot more Green Space. I am concerned however that leaving it to Local Authorities has dangers. Local Authorities are under enormous pressure from developers and gain financial if green spaces are lost or developed.

Page: [Policy G5 Urban greening](#)

Section: [N/A](#)

Totally support the policies on Urban Greening. Compliance would ensure better more pleasant communities in which people will want to live.

Page: [Policy G6 Biodiversity and access to nature](#)

Section: [N/A](#)

Totally support protecting special sites. I would also like Areas of Special Interest added. Although these are designated by individual Local Authorities, they can easily be de designated when Local Authorities are under pressure. These sites form part of the wider London picture of areas for wildlife and nature and need to be protected by an overarching body.

Page: [Policy G7 Trees and woodlands](#)

Section: [N/A](#)

Totally support the protection and extra planting of trees. Veteran and Ancient trees are invaluable wildlife habitats and and destruction and planting of new trees as replacements can never provide the rich source that exists.

Page: [Policy G8 Food growing](#)

Section: [N/A](#)

Totally support the encouragement of food growing at all levels. We have a number of succesful City Farms, which apart from food production also bring numerous educational and well being benefits to people. Encouraging more local farming and food production would also bring Green Benefits.
