My main concern is concerning the expansion of City Airport.

Having now lived under the saturation concentrated flight path of the above airport I am really concerned that we will get more and more aircraft noise pollution.

I am concerned as to what the Mayor's plans would be to prevent these noisy jets that we now have to suffer being replaced by larger and yet more noisy jets.

We haad for years only had the quiet pro jet aircraft but these past 3 years they have been gradually replaced with really loud jet engines that has caused so much misery to thousands of Londoners.

Will this plan for London address these issues of 1 concentrated flightpaths causing noise ghettos across a swathe of east and southead London. 2 clamp down on the types of aircraft allowed to fly from City Airport and listen to the voices of us Londoners who have to bear the brunt of your decisions

Yours

M Valler
