PLANNING INFORMATION COMBINED PLANNING DATA STANDARD

Version 2 V2.2

INTENTIONALLY BLANK

MAYOR OF LONDON

1.0 Introduction

- 1.1 The GLA Planning Data Standard sets out the additional information that is required to be submitted as part of any planning application in the GLA area.
- 1.2 This combined standard includes the information required by the London Data Standard, together with the information sought for the work being carried out by MHCLG for the development of a single planning register together with additional information required for the monitoring of the Housing Delivery Test.
- 1.3 This information is required to enable the monitoring of development taking place in London and enable efficient spatial planning to take place.
- 1.4 This document will be updated from time to time and developed taking into account future planning needs and objectives. Changes will be widely publicised both on the London.gov.uk website and amongst the suppliers and users of this data set.
- 1.5 The breakdown of the document is:
 - 2.0 System Technical Requirements
 - 3.0 Householder Extensions
 - 4.0 Prior Approval for Residential Conversions
 - 5.0 All Other Application Types – Information to be provided by applicants
 - 6.0 All Other Application Types – Additional Information to be provided by LPA back office systems.
- 1.6 In completing a planning application for any developments in the GLA area, all fields will be mandatory for the relevant application type.
- 1.7 The data shall be uploaded automatically from the Local Planning Authorities' systems in respect of all application types:
 - (i) When the application is first made valid
 - (ii) When any data relating to the application is amended
 - (iii) When the application is determined, regardless of the decision or whether an application is withdrawn.

Further work will be undertaken to identify indicators for:

 - (iv) When planning permissions are implemented (v) When planning permissions are completed.
- 1.8 Cross Borough Applications will need to be reported by both boroughs, however the same lead UPRN will need to be used.
- 1.9 This Non-Technical Data Standard lays out the information we will be collecting in terms familiar to local authorities and the building industry. A Technical Data Standard will follow to provide specific schema, formats, and other relevant details for each question.

2.0 Back Office System Technical Requirements

The GLA is keen to ensure it does not exclude providers from the back office provision market, but at the same time in order for automated data to work there are some minimal functionality requirements that must be met:

1. Receiving Applications	
(i)	The system must be capable of receiving all applications electronically including a. Application Information b. Supporting Documents From the Planning Portal and any other provider of a submission portal.
(ii)	The system must auto-populate the fields with the submitted information.
(iii)	The system must be capable of having information amended through any portal, flag up when any changes have been made and information locked when a decision is made.
2. Extracting Information	
(i)	The system must be capable of having any information relating to any case extracted using a scheduled report.
(ii)	The system must be able to have any related polygons extracted with identifiers linking them to the case.
