

Environment and Utilities

Strategic Policy 8 Green Infrastructure and Open Space

Sets out policy to deliver and/or contribute towards a varied, well-designed, integrated and high quality green infrastructure and open space network, by:

- delivering new green infrastructure and open spaces including delivering 30% of the area outside of Strategic Industrial Locations (SIL) as public open space
- delivering 3 new Local Parks in Old Oak, each of at least 2 hectares
- improving the ecology of the area
- ensuring major development proposals are accompanied by a Green Infrastructure and Open Space Strategy and Management Plan

Development Management Environment and Utilities Policies

Sets out different policies as follows:

- **EU1** - secure the delivery of a high quality green infrastructure and open space network that enhances the overall quality of the environment
- **EU2** - secure an overall increase in green cover and a net gain in biodiversity
- **EU3** - deliver an integrated strategy for managing water and risk of flooding
- **EU4** - appropriately minimise air pollution and make a positive contribution to overall improvement in air quality
- **EU5** - ensure noise and vibration is minimised
- **EU6** - sustainably manage waste
- **EU7** - support the Circular and Sharing Economy
- **EU8** - ensure the use of high quality durable, adaptable and sustainable materials, finishes and details
- **EU9** - minimise carbon emissions and overheating
- **EU10** - promote the delivery of low carbon, energy efficient and integrated electricity and heat networks
- **EU11** - position Old Oak and Park Royal as a world leading location for the adoption of smart city technologies, systems and approaches
- **EU12** - manage the extraction of minerals
- **EU13** - effectively treat, contain or control any contamination of land
