

# Grand Union Canal

## Vision summary

The Grand Union Canal will:

- continue to be a **defining feature** of the area
- be conserved and enhanced as a **conservation area**
- see enhancements to its **ecology**
- be a high quality **walking and cycling route** with improved access from adjacent areas
- be promoted for **passenger and freight transport**
- have new and improved **moorings** with related infrastructure
- deliver **town centre uses** at the crossings of key streets with **housing and employment uses** in other locations
- be supported by active frontages to increase **safety** and **vibrancy**
- deliver a **new Local Park** along its edges within Old Oak and other open spaces along its length
- deliver new multifunctional **water spaces and basins**
- support **sustainable drainage** from adjacent areas
- deliver a **range of building heights** sensitive to the canal's heritage with opportunities for tall buildings at key crossings to support local legibility by helping people to navigate across the area
