Appendix 2. Community Oranie assessment criteria	40

# 1. Making London a National Park City

London is already a green city. Almost half of the capital is green. This includes: parks and amenity space, the countryside and farmland in London's green belt, nature reserves, private gardens and blue spaces like rivers and canals. Roughly 20 per cent of London is covered by trees, mostly as part of the city's green spaces. There are also many trees in the city's streets and built environment

Collectively, London's parks, rivers, canals, trees and other green spaces make up a vital **green infrastructure** (see below). As London grows, this green infrastructure must work even harder. This will help improve Londoners' health, protect the city from climate change, create habitat for wildlife, and support the capital's economy. Yet many parts of London, especially in densely populated or deprived areas, lack green space or have little tree cover.

#### What is green infrastructure?

Green infrastructure is the network of green (including street trees and green roofs) and blue spaces (like rivers and canals). It is planned, designed and managed to:

- promote healthier living
- lessen the impacts of climate change
- improve air quality and water quality
- encourage walking and cycling
- store carbon
- enhance biodiversity and ecological resilience

In the London Environment Strategy, the Mayor set out his aim to help make London the world's first National Park City. As such, the natural environment will be protected and the network of green infrastructure managed to benefit all Londoners. This will include:

- ensuring that over half of London is green cover in 2050
- increasing tree cover by ten per cent by 2050
- conserving and enhancing wildlife and natural habitats
- valuing London's natural environment as an economic asset and supporting more investment in green infrastructure

The Mayor is improving London's green infrastructure, and helping to make London the first National Park City by:

- updating green infrastructure policies in the draft new London Plan. This includes strong protections for the Green Belt and other green space, and a proposed Urban Greening Factor to encourage greener development
- ensuring that transport schemes protect existing, and provide new green infrastructure by planting trees and installing sustainable drainage. This is part of Transport for London's Healthy Streets Approach
- seeking out opportunities in major projects led by City Hall's Housing and Land and Regeneration teams to include green infrastructure. This includes extra support and funding for green infrastructure for some projects supported by the Mayor's Good Growth Fund
- supporting boroughs and other land managers to fully value London's green infrastructure. The Mayor is helping to build the case for investment, and has published a Natural Capital Account for London's Public Green Spaces. He will also launch a London Green Spaces Commission in 2018
- providing a £12m package of funding and advice the Greener City Fund. This will help boroughs, local communities, and environmental organisations run projects to plant more trees and improve London's green spaces

A National Park City is a vision and way of working together, not a designation. To make it happen, we must engage a wide range of Londoners with the idea. That's why the Mayor is working with partners to develop a series of linked campaigns and events. This will help Londoners to enjoy, take part in and contribute to London becoming a National Park City. They include National Park City Week from 21-29 July 2018, when the Mayor will launch a new campaign to help Londoners green the city.

# 2. Greener City Fund

The Mayor launched the Greener City Fund in summer 2017 to create and improve green spaces and encourage tree planting and management in London. In spring 2018, this fund was increased to £12m. We've already funded over 80 projects across London, which you can see on our Greener City Map.

The Greener City Fund has four parts:

- Community Tree Planting and Green Space Grants: The Mayor has committed £5m to help Londoners plant trees and make our city greener. These community grants will be offered in several rounds. In the first round, £400,000 was awarded to 29 tree planting projects running from October 2017 March 2018. Another £1.1m went to 55 green space projects happening in 2018. The second round of tree planting grants will be awarded in summer 2018.
- Strategic green infrastructure projects: The Mayor has committed £3m to major projects that bring a range of environmental benefits. This includes over £800,000 allocated to nine projects via the Good Growth Fund to increase greening of the built environment, and over £2m Green Capital grant funding awarded to six major green space projects in May 2018.
- London's urban forest: City Hall will work with partners, boroughs, Londoners and businesses on projects to help plant and look after trees in London. The Mayor's £3m funding includes £1.5m to help create new woodlands, and additional funding to: pilot new approaches to supporting tree planting in public space; improve data about London's trees; and support London-wide projects.
- Community engagement: The Mayor has committed £1m to work with partners and Londoners on a range of community and public engagement programmes in the run up to London becoming a National Park City in 2019.

# 3. Community Green Space Grants – round two

We're looking for great projects to create or improve green spaces and increase Londoners' access to nature. The case studies in this document offer some ideas of the types of projects we hope to support. They're not exhaustive and we are keen to hear your ideas.

#### 3.1. Grants available

Community Green Space Grants of £5,000 - £50,000 are available. There is a new type of grant on offer this year to support greening projects in schools to help protect students from air pollution. You can apply for:

- small grants from £5,000 £20,000
- medium grants from £20,000 £50,000
- school air quality greening grants from £5,000 £50,000

Only exceptional projects will be awarded the larger grants. You cannot apply for a grant less than £5,000.

A total of £1.1m is available in this funding round from the £5m committed to Community Tree Planting and Green Space Grants. Up to £300,000 of this total will be for school air quality grants.

#### **Community Green Space Grants – round two**

These grants aim to improve and create green space across London, and improve Londoners' access to nature. They will give community groups and local people the chance to design and create new spaces by providing funding, advice and support.

We want to work with a range of stakeholders, including community groups, boroughs, schools, businesses and charities. Applications are welcome from those that work with a diverse range of people and help connect local communities to nature.

The sort of activities the grants will support include:

- creating a community garden, especially for and with hard to reach groups
- improving parks and other green spaces for people and wildlife
- installing green sustainable drainage features, such as rain gardens
- creating connections between areas or green and enhancing active travel routes
- improving an area for and access to wildlife
- creating natural play space for children
- restoring rivers and other waterways
- creating pocket parks in urban areas

However, this is not an exhaustive list. Projects might also contain different types of improvements, and we are keen to hear your ideas.

#### School air quality greening grants

There is a new type of grant available this year to support greening projects in schools that help protect students from air pollution. Up to £300,000 is available to schools this year.

These grants from the Greener City Fund are part of a new £1m fund created by the Mayor this year to bring in a range of measures to help protect students from toxic air in the worst affected schools. More information about this fund is available on our website. This follows the Mayor's school air quality audit programme, which audited 50 primary schools in London's most polluted areas.

#### Mayor's school air quality audits

The Mayor's school air quality audits programme carried out detailed audits in 50 primary schools located in areas which exceed EU pollution limits. The audits assessed the air quality in and around some of London's worst polluted primary schools and have made a series of recommendations to protect students from exposure to poor air quality. The programme also produced an audit toolkit for other schools to use.

These recommendations include a variety of measures such as restricting vehicular access on roads near schools, tackling engine idling, promoting cycling and walking, and air filtration systems in classrooms. They also include specific recommendations to install green infrastructure, such as green 'pollution barrier' hedges, ivy screens and planting trees.

As well as the school air quality greening grants, the Mayor's new £1m fund includes:

- £500,000 for non-transport interventions at all 50 audited schools
- £250,000 to launch a new nursery audit programme that will carry out audits, and trial filtration systems to reduce indoor air pollution at 20 nurseries in the most polluted areas

#### Which schools are eligible for an air quality greening grant?

School air quality greening grants are open to applications from **all London schools** (**primary and secondary**) **located in an area exceeding legal pollution limits** for nitrogen dioxide (NO<sub>2</sub>). There is a full list of eligible schools in Appendix 1. If you're not sure if your school is eligible, please contact the Greener City Fund team at greenercity@london.gov.uk.

Applications may be submitted by the school, borough, academy trust or parents/friends group.

If your school isn't eligible for an air quality greening grant, you can still apply for a standard small or medium Community Green Space Grant.

#### What measures can a school air quality greening grant support?

Applications for school air quality greening grants should primarily focus on greening measures to reduce students' exposure to air pollution and protect them from toxic air. This could include:

- installing a green screen (for example ivy), or barrier hedge around the perimeter of the school grounds
- planting trees, shrubs and planters within the school grounds to capture emissions
- making a green gateway on the approaches to the school, including planting on the footway or highway buildouts
- creating a pocket park on space reclaimed from roads around the school

You'll find advice and guidance on greening measures to help protect students from air pollution in the Mayor's school air quality programme master report and school audit toolkit.

Projects should focus on improving air quality. They should also provide other benefits like increased biodiversity and cooling the urban environment. They should involve students in making the projects happen.

#### CASE STUDY: Goose Green Primary and Nursery School, Southwark

The Friends of Goose Green School were awarded a Greener City Fund Community Green Space grant in 2017 to install a green ivy screen around the school's playground. The school is located by the busy A2216 road in East Dulwich, where levels of air pollution exceed the legal limit.

The school hosted a series of volunteering days involving students, parents and local residents. Over 100 people were involved, including 60 students.

The green screen now runs the full 87m length of the perimeter fence next to the road. This reduces pollution within the school playground and provides a habitat for wildlife and teaching children about nature. The school is working with Goldsmith's University to monitor the screen's impact on air quality.

Photo: Friends of Goose Green School

#### 3.2. What Community Green Space Grants will achieve

#### **Transforming London's environment**

The fund will focus on creating an accessible network of well-designed green spaces. Projects supported through the Greener City Fund Community Green Space Grants will also help to boost London's green cover by greening the grey.

Projects will also consider the needs of their area and contribute to:

- reducing flood risk
- improving air and water quality
- cooling the urban environment
- enhancing biodiversity and ecological resilience
- storing carbon

School air quality greening projects must contribute to improving air quality in and around the school.

We welcome project proposals from locations that lack publicly accessible green space.

#### Making better places

London has a wealth of public spaces, such as streets, squares and green spaces, that are freely accessible to all. We want to see projects that are part of a wider long-term effort to improve a place. Urban greening should be used to make better, more imaginative use of existing spaces to benefit more people.

Community Green Space projects will help make London greener and improve access to nature for children and groups that use green space less often. Projects will improve the quality of the place. They will include opportunities for informal gathering, play, tranquil places to rest and enjoy nature, as well as encouraging people to walk and cycle.

Projects need to be coordinated with other local changes. That means they should understand how the surrounding area is used, and fit their location and context.

#### **Empowering people**

To build a fairer city and stronger communities, we need to bring people together at a neighbourhood level. We want to see projects that cater for London's diverse and changing population. We welcome projects that will improve Londoners' quality of life and contribute to their health and wellbeing.

Community Green Space projects should have the support of different local groups and have a positive impact on the local and wider community. We particularly welcome projects that will actively involve schools and children, and improve their access to nature. Many projects will also engage people in training and volunteering opportunities.

We welcome projects that seek to engage communities who lack access to green space, including BAME Londoners and those living in deprived areas. We also welcome projects that

seek to provide opportunities for traditionally under-represented groups to take part, such as refugee and migrant communities, or older people.

#### Making things happen

Funded projects must be completed on time and within the agreed budget. All applications need to have a well thought out project plan, considered the risks, and have some match funding in place. Templates to help your thinking can be found in the application form. Proposed actions must be completed within the scheme's timeframe (see the key dates in section 4 for more detail).

#### Leaving a positive legacy

The Mayor wants to make London an even greener city and leave a legacy of environmentally sound, well designed, and much-loved spaces. The projects we fund must contribute to this aim. Community Green Space projects should have a clear plan for maintaining the new green space, and sustaining any volunteering.

Projects should know what they hope to achieve, such as increasing visitors to a space by making it safer, more accessible and more attractive. Larger projects will measure the impact of improvements, for example by counting numbers of visitors before and after the project takes place.

## CASE STUDY: Core Landscapes, Tower Hamlets

Core Landscapes transforms vacant land in poor urban areas into hubs for community engagement through horticulture, design, workshops, training and events. The end result is good for physical health, mental wellbeing and community cohesion.

Their site next to the Royal London Hospital in Whitechapel, incorporates a plant nursery, pocket park and construction space. Everything is container grown to withstand moves to new locations.

Find out more:

https://www.corearts.co.uk/core-landscapes/

Photo: Core Arts

# CASE STUDY: Community-led climate change adaptation, Hammersmith & Fulham

This project worked with local residents to design and retrofit climate change adaptation schemes in open spaces on three housing estates. The solutions include green roofs and sustainable drainage systems (SuDS).

Run by Groundwork and Hammersmith & Fulham Council, it has proved a cost-effective way to boost climate change resilience.

Find out more: www.groundwork.org.uk/sites/urbanclimateproofing

# 4. How to apply

Read this guide carefully. Your project must address the aims set out in section 3. Please see the table on page 14 for key dates and details of support with your application.

The **application form** for Community Green Space Grants is on our website. This should be completed in full and submitted at: www.london.gov.uk/what-we-do/environment/parks-green-spaces-and-biodiversity/apply-community-green-space-grant

The deadline for applications is 5pm, Monday 1 October 2018.

Projects should take place between January 2019 and December 2019.

#### **Future funding rounds**

The third round of the Community Green Space Grants will open in 2019 for projects taking place in 2020.

The second round of Community Tree Planting Grants closed in June. A third round will open in 2019 for projects happening in the 2019/2020 planting season.

#### 4.1. Support for preparing your application

The application process and timeline is outlined in the table on page 14.

If you have questions about the application process please contact: greenercity@london.gov.uk

Please check the Greener City Fund Project Toolkit, and our website for details of support with preparing your application: www.london.gov.uk/greener-city

We will be holding an **applicant workshop** from 4pm until 6pm on Thursday 6 September at LIFT, 45 White Lion Street, N1 9PW. This will be an opportunity to hear from the Greener City Fund team about the aims of the grants. It will also give you a chance to ask questions about your project and receive advice on completing your application. The workshop is optional, and is not mandatory for applicants. If you'd like to come along, book your place by emailing greenercity@london.gov.uk.

Application forms must be uploaded to our website with at least **three photographs** of your project site and a **sketch design or indicative planting plan**. You can also upload additional files, including maps, design drawings or letters of support.

Section 5 of this guide covers the main application requirements. You should also read the Greener City Fund Project Toolkit for further advice on planning and designing your project.

Greener City Fund: Community Green Space Grants Round Two		
10 July 2018	Applications for Community Green Space Grants open	
10 July – 1 October 2018	<ul> <li>Read the Community Green Space Round Two Grants Guide in full to understand the fund requirements and how to apply</li> <li>Read the Greener City Fund Project Toolkit to help plan your project</li> <li>Contact the Greener City Fund team at greenercity@london.gov.uk, or attend the applicant workshop on Thursday 6 September for additional support</li> <li>Complete the application form</li> </ul>	
Before 5pm on 1 October 2018	<ul> <li>Go to the website to submit your application www.london.gov.uk/what-we-do/environment/parks-green-spaces-and-biodiversity/apply-community-green-space-grant</li> <li>Ensure you submit:         <ul> <li>completed application form</li> <li>three photos of your project site</li> <li>a sketch design or planting plan</li> <li>any other supporting information</li> </ul> </li> </ul>	
October 2018	The Greener City Fund team may ask you for more information to help assess your application, or arrange a site visit.	
November 2018	Grants panel meets to assess applications, and successful projects are announced.	
December 2018	If successful, you'll be asked to complete and sign a funding agreement, including project milestones and criteria for grant payments.	
January 2019 – December 2019	Community green space projects happen	
February 2020	Monitoring information submitted and funding claimed* (*subject to meeting relevant milestones)	

### CASE STUDY: Sydenham Garden, Lewisham

The gardens and nature reserve are used to help local people recover from mental and physical ill-health. Volunteering projects include gardening, arts and crafts and cooking. Sydenham Garden takes referrals from local GPs for adult mental health and dementia.

Sydenham Garden has also recently opened De Frene, creating a new market garden on an old allotment site.

More information: www.sydenhamgarden.org.uk/about -us/

Photo: Sydenham Garden

## CASE STUDY: Hoopla Gardens, Lambeth

The Edible Bus Stop worked with the local community to green a grey and uninspiring public space in West Norwood. Inspired by the game of 'Hoopla', the bollards become the pegs in the game, with round concrete rings placed over them.

The 'hoops' themselves provide a series of varying sized planters and seating areas. The planting is mainly native or wild, and features fruit bushes, nut and fruit trees, creating an urban orchard.

Find out more: http://theediblebusstop.org/hooplagarden/

Photo: Edible Bus Stop

# 5. Application guidance

#### Which grant scheme to apply to

We know that green space projects often include some tree planting. If the tree planting is only a small part of a larger project you should apply for a Community Green Spaces Grant. If tree planting is your project's primary focus, you should apply for a Community Tree Planting Grant. The third round of Community Tree Planting Grants will open in 2019 for projects to take place during the 2019/20 planting season.

We will consider orchard projects for the Community Green Spaces Grants where these will happen over a longer timeframe. If you would like advice on which grant scheme to apply to, please email greenercity@london.gov.uk or call 020 7239 1292.

#### 5.1. Application requirements

#### **Eligible organisations**

Community Green Space Grants are open to: civil society organisations and community groups, charities, housing associations, private landowners who own or manage public green space, schools, and boroughs. Housing associations, businesses and boroughs must show commitment to community participation, co-design and capacity building.

Applications must be from a formally constituted organisation able to enter into legal contracts. If you are an individual, you should try and find a suitable local organisation and develop your idea together.

You should be able to show clear and representative governance arrangements (your mission statement, who you represent, how you conduct yourselves and your membership, key roles and responsibilities etc.) and provide details of an organisational bank account. Companies and charities applying for grant funding will need to send in supporting financial information outlined in **Section 2** of the application form.

My organisation is new and does not have previous years' accounts – can I apply? New organisations are not excluded from applying. However, if you do not have two years of audited accounts, you must have a statement of the organisation's current turnover, profit and loss, and cash flow position.

#### Can businesses apply for a grant?

Yes, businesses can apply provided your project has community benefit and commitment to community participation, co-design and capacity building.

#### **Collaborative applications**

We welcome applications that show your organisation is working together with, and involving, other local groups. However, you must nominate a lead organisation to apply for the grant.

This lead organisation would get the funding, distribute it to other partners and complete project monitoring, should your application be successful.

#### Can I use another organisation's bank account to receive grant payments?

Yes, you may partner with another organisation who will receive grant payments into its bank account. However, as the receiver of the funding, it will be the lead organisation and applicant rather than you. It will sign the funding agreement and be responsible for providing monitoring information and making sure your project is successful. Please ensure any organisation you wish to partner with for this purpose knows about these responsibilities when applying.

#### Location, permission, feasibility and risk assessment

The site of your planned activity should be publicly accessible or clearly benefit many people (for example, by being in communal areas in a school or hospital).

Please do not apply unless landowner permission has been granted. You should also have any other applicable third-party permissions and consents in place. You should also have done an initial risk assessment of constraints to ensure your project is practical and possible.

Can I submit a new application if I've applied for a Greener City Fund grant before? If you have previously been awarded a Community Tree Planting Grant, Community Green Space Grant or Green Capital Grant, you can apply again provided that this application is for a separate project. This could be at a different site, or a new project at the same site.

If you applied for the first round of Community Green Space Grants and were unsuccessful, you can submit a revised application for your project.

#### Can I submit more than one application?

You can submit more than one application to the Community Green Space Grants where these are for different projects at different locations.

Generally, we expect to see separate grant applications tailored to each specific site. However, we can consider funding projects across several sites in certain circumstances. For example, where activities at each individual site are small and for very similar activities, but together they meet the grant funding thresholds.

You should not submit multiple grant applications for the <u>same</u> project, or the <u>same</u> site. Please give each project a clear project name that relates to the work you'd like to do.

#### Are these grants only for projects on publicly-owned land?

No, the land doesn't have to be publicly owned. However, it should be publicly accessible or provide demonstrable community benefit.

#### I want to apply but I don't have landowner permission

You must get landowner permission in writing first, as this can cause major delays to projects. There are several rounds of funding available, so there is time to get permission and then apply in a later around.

#### I want to create a project but I only have short term permission

We will consider meanwhile spaces. However, we expect a minimum of three years of permission to use. The design and plan should allow for relocation or offer an approach to ensure the project survives into the medium to long term.

If you would like us to confirm whether your proposed application is eligible, please email greenercity@london.gov.uk or call 020 7239 1292.

#### **Eligible costs**

For Community Green Space Grants, most grant funding should be spent on activity needed to complete the physical capital works involved in the project. This includes buying plants and other materials, planting costs, machine and equipment hire.

#### Staff and professional costs

Up to a **maximum of 15 per cent** of the total grant can be spent on additional costs that are **required** for project delivery. This can include design, specialist skilled labour, and staff costs essential for project delivery (for example volunteer management).

#### Ancillary costs

Up to a **maximum of ten per cent** of the total grant can be spent on ancillary costs that support, but are not necessary for, project delivery. This can include items such as volunteer expenses, catering, marketing (for example, flyers, posters), celebration events, cultural or educational workshops or extra staff costs.

If you're unsure whether an activity is a non-direct or ancillary cost, please email greenercity@london.gov.uk or call 020 7239 1292.

#### Maintenance costs

We recognise that maintenance is important in green space projects. Up to a maximum of **five per cent** of the total grant can be allocated to maintenance for up to two years beyond the end of the initial project delivery. We also encourage your project to build skill and capacity amongst the community to help ensure the project is a long-term success.

Your application must show a commitment and ability to provide long term maintenance. Maintenance costs will be paid at the project's end on receipt of a maintenance plan and schedule, and details of how the budget will be ringfenced. We may inspect projects during the two-year period.

Eligible costs overview (% of total grant)	
Physical capital works	Minimum 70 per cent  Includes buying plants and other materials, planting costs, machine and equipment hire.
Ancillary costs	Maximum 10 per cent  Includes volunteer expenses, catering, marketing (for example posters), celebration events, cultural or educational workshops, extra staff costs
Staff and professional costs	Maximum 15 per cent  Additional costs that are required for project delivery. This can include design, specialist skilled labour, and staff costs essential for project delivery (e.g. supervising volunteers).
Maintenance costs	Maximum 5 per cent

#### Office overheads, stationary, premises rent

Overhead costs, stationery, premises rent or anything else which is not project specific will not be funded.

#### What we won't fund

#### 'Business as usual' activities

We can't accept applications to fund routine maintenance or repairs, or projects that are a continuation of existing work.

#### Land purchase

We will not fund the buying of land for your project.

#### **5.2. Financial requirements**

Lead organisations that are not local councils or local council controlled schools may need to submit documents for financial due diligence checks (such as recent accounts). You can find out more about this in the application form.

#### Match funding and budget

Applications should show that City Hall's funding will help improvements and activities to take place that go beyond those already planned.

Projects should lead to tangible improvements. Proposals can include budget requests for elements such as design work and consultation. However, most of our funding should be used to support actual environmental improvements, like better green space.

Projects should show that they have match funding in place. Applications for small grants should demonstrate at least 25 per cent match funding (so if you apply for a £10,000 grant, you will need to have at least £2,500 of match funding).

Applications for medium grants over £20,000 should show at least 50 per cent match funding (so if you apply for a £40,000 grant, you will need to have at least £20,000 of match funding).

Applications for school air quality greening grants should have at least 25 per cent match funding for applications up to £20,000, and at least 50 per cent match funding for applications over £20,000.

#### What is considered match funding?

For local councils, we expect financial match funding. For other organisations, we can accept items such as goods in kind, or staff, or some volunteer hours, although we also expect to see some financial match funding. Match funding should be genuinely associated with the project and be used to achieve the same outcome.

We will discuss on a case by case basis whether other GLA or TfL funding can be accepted as match funding (other GLA or TfL funding should not comprise more than 50 per cent of your project budget, and our Greener City funding should always have distinct project outputs). For school air quality greening grants, the £10,000 starter grants provided to the 50 schools that took part in the Mayor's school air quality audits **cannot** be accepted as match funding.

#### Assessment process and criteria

An evaluation panel will assess all applications. The panel will include representatives from City Hall and external environmental organisations. You can find a copy of the evaluation form that will be used to help assess the applications in Appendix 2. It measures how well your application meets the aims of the funds, as set out in section 3. It also assesses if your project has a clear budget, plan and outcomes. We may ask for more information on your project to help the panel decide and arrange site visits ahead of the panel assessment.

In making funding decisions, we will also consider the location and type of projects. This will help support a balanced programme of projects across London. We may also not allocate all available funding in any one round, so that we can actively target under-represented areas and/or priorities in future rounds.

See section 4 for the timeline of key dates. Once the evaluation panel has met, you should expect to hear if your application has been successful within one month.

#### Funding terms

Any offer(s) of funding will be made subject to you accepting a grant agreement which must be signed before your project can start. It will include detail of your project's milestones and when your grant will be paid.

We will give you a monitoring form to complete and return by the end of your project. This will include the requirement to provide evidence of expenditure. You will also be expected to provide interim updated on project progress via email in April and October 2019.

#### **Payment in arrears**

Community Green Space Grants are paid in arrears (other than maintenance costs). You will receive funding once you have completed your project and return your monitoring and claim forms, including proof of expenditure, at the end of your project. It is expected that projects will be finished by December 2019, however if your project is complete before then, payment can be made after March 2019 on receipt of monitoring and claim forms.

We understand that for longer projects there may be cash flow difficulties in being paid in arrears, particularly for smaller community organisations. We have several measures which aim to make Greener City Fund grants accessible to community groups.

#### Interim payment

We can make interim payments to grant recipients, where a claim form and accompanying expenditure information is submitted with a group's mid-term monitoring report. We will aim to make all payments within one month. This is conditional on all necessary information being submitted. Payment may take longer if information is missing or the Greener City Fund team require further clarification.

#### **Up-front payment**

Groups may be able to request up-front payments. The intention of this is to ensure the Greener City Fund is as accessible as possible to a range of community group sizes. To be eligible for such payments, you must provide further information (by way of a claim form) which shows:

- your organisation's reserves do not allow you to start the project without up-front payment
- you have attempted to partner with organisations who could provide funding support
- an interim payment would not be sufficient to enable your project to go ahead
- you have evidence for the cost of all items for which you require up-front payment

Up-front payment will be available as follows:

 Initial payment in January 2019 (start of project) of up to 25 per cent of grant total, or no more than £5,000. Expenditure must be reported in the email update required end of April 2019 (first quarter)  Second payment in April 2019 of up to 50 per cent of grant total, or no more than £10,000, conditional on receipt of initial payment reporting. Expenditure must be reported in the email update required end of October 2019 (third quarter).

The remaining project funding must then be claimed in arrears on completion.

# Appendix 1: Schools eligible for air quality greening grants

School air quality greening grants are open to applications from all London schools (primary and secondary) located in an area exceeding legal pollution limits for nitrogen dioxide (NO<sub>2</sub>).

This data is available on the London Datastore, broken down by parliamentary constituency. It is based on the current 2013 data from the London Atmospheric Emissions Inventory. If you are unsure of your school's eligibility, please contact: greenercity@london.gov.uk.

Schools are ordered alphabetically.

School	Borough
Abacus Belsize Primary School	Camden
Abbey Manor College	Lewisham
Abercorn School	Westminster

# **Appendix 2: Community Grants assessment criteria**

The following sheet will be used to assess applications. Please do not complete. This does **not** form part of the application form.

Criteria	Description	Score:	Considerations and
circoria	Description	1 to 5	comments
ransforming Lo	ndon's Environment	I	
Environmental mprovements	Will the project help to address local environmental issues, such as air, noise pollution, surface water flooding?  Will the project enhance biodiversity?		
	Will the project address a specific area of access deficiency?		
ackling air ollution (for chool air quality rants)	Will the project make a tangible difference to air quality within and around the school?		
Making better p	laces		
more useable pace	Will the project improve the space significantly, and do the photos and/or designs show the impact?		
Access to green pace	Will the project help improve access to nature for children and/or others who do not often use green spaces?		
Recreational opportunities	Will the project provide recreational opportunities, such as informal gathering; active play; tranquil places to rest and enjoy nature; encouraging more walking and cycling.		
Empowering peo	ple		
Enabling skills	Will the project give people an opportunity to volunteer or learn new skills?		

Greener City Fund Assessment Sheet			
Community need	Does the project show an ability to support community cohesion, wellbeing, outreach for disadvantage groups, or address other community need?		
Local support	Has the project obtained support amongst a variety of local community and other interest groups?		
Making things ha	ppen		
Project plan	Is there a clear project plan in place supported by a timetable of milestones? Are the risks manageable?		
Match funding	How secured is the match funding?		
Project budget	Is the proposed budget and the associated costs reasonable?		
Leaving a positive	e legacy		
Maintenance	Has the future management and maintenance been fully considered?		
Project outcomes	Does the project clearly articulate what the outcomes of the project will be? Are they realistic and sustainable?		
Total			

#### \* Scores for range from 1-5 (1 = Low, 5 = High). Where:

- 1 Does not meet the minimum aims of the programme, does not describe the details of the project.
- 2 Meets the minimum aims of the programme, describes some details about the project but does not explain wider context
- 3 Meets the minimum aims of the programme, clearly explains the project and puts it in context.
- 4 Goes beyond the minimum aims of the programme, clearly explains and evidences the project and puts it in context
- 5 Ambitious programme or project which exceeds the minimum aims of the programme, detailed explanation and evidence of the project, includes elements of innovation in approach
