National Grid Electricity Transmission Data Terms and Conditions for National Underground Asset Register Hub

1. This document sets out the terms and conditions by which National Grid Electricity Transmission (**02366977**) ("NGET") makes its datasets ("NGET Data") available to a party ("End User") accepting the NUAR End User Terms via the NUAR Hub and is in accordance with clause 4.6 of the NUAR Hub End User Terms. Unless defined separately in this document, all capitalised words have the same meaning as in Schedule 1 of the NUAR Hub End User Terms

2. For the avoidance of doubt these terms and conditions take precedence over NUAR Hub End User Terms (including the Licensed Use) and the information and processes in Clauses 3 and 4 should be understood and followed before work of any kind is undertaken by the End User.

3. Data Quality and Ownership

3.1 The NGET Data contained in NUAR are to be used for indicative purposes only.

3.2 This data is supplied on a best-effort basis only, using available information as documented at the time by NGET. While every effort is made to make sure the information is accurate and up-to-date, NGET does not accept any liability for any direct, indirect, or consequential loss or damage of any nature--however caused--which may be sustained as a result of reliance upon such information.

3.3 The NGET Data contains electricity transmission data only. For electricity distribution data, please contact the distribution company for your area. You can find your local distribution company by going to the [Energy Networks website](#).

3.4 NGET NUAR Data should not be downloaded or printed from the NUAR Hub.

4. Safe Dig and Asset Protection Assurance

4.1 The NGET Data is not to be relied upon for planning any works, including but not limited to construction and excavation activity i.e. 'ground works' and 'safe dig' activities, in the area mapped within the NUAR Hub.

4.2 Licensed users (those Users who have accepted the NUAR Hub End User Terms) of the NUAR Hub along with any other party that are planning to undertake any works must comply with the processes on the Cadent website or contact the Plant Protection team at least 14 days in advance of any works.
