The RE:NEW Support Team has developed a comprehensive technical risk toolkit to help protect your investment and minimise the risks associated with retrofit projects.

Created in conjunction with low-energy experts, the toolkit includes an assessment process to consider the potential risks of retrofit measures for each project.

You can access support from the RE:NEW Support Team to benefit from advice on the assessment process, take advantage of expert guidance around retrofit 'watch points' and gain knowledge from the team on delivering specific retrofit installations.

For more information about the technical risk toolkit contact the RE:NEW Support Team: renew@london.gov.uk.
Why undertake technical risk analysis?

Protecting retrofit projects from technical risk and unintended outcomes is paramount to securing return on investment and sustain an organisation’s confidence in retrofit. Assessment at the start, during and close of your project helps you to understand, manage and mitigate these risks.

Technical risk toolkit

The toolkit contains three components which will be delivered by the RE:NEW Support Team. The tools are designed to provide support to your retrofit projects at any stage including planning, delivery and/or troubleshooting completed projects.

The toolkit includes:
1. Assessment
   An assessment of the technical risk of your retrofit project based on a set of measures developed by low-energy experts. The risk assessment process assigns risk scores for specific measures and their various combinations.

2. Expert guidance
   Recognising and guiding your retrofit project planning around ‘watch points’ developed through extensive experience and best practice. The RE:NEW Support Team will work with you to identify the ‘watch points’ on your project, highlight potential challenges and provide guidance on technical project management practices.

3. Knowledge transfer
   You will have access to informative factsheets about the major identified risks in the assessment process. Each factsheet will equip you with knowledge about specific issues, how they might develop and where to obtain further best practice industry guidance. All guidance is explained in plain English.

What to do if you are interested

The RE:NEW Support Team will provide you with the guidance and support you need to help undertake technical risk analysis.

Email renew@london.gov.uk to find out more about assessing the risk of your domestic retrofit project.

CONTACT THE RE:NEW SUPPORT TEAM

E RENEW@LONDON.GOV.UK

RE:NEW provides a highly skilled and experienced Support Team which offers FREE support to social landlords and mixed tenure schemes to increase the scale of domestic retrofit.

The support is tailored to each organisation and comprises:
• a review of retrofit potential
• formulation of retrofit projects
• funding and procurement advice
• support through the procurement process

90% of RE:NEW programme funding is being provided by the EIB European Local Energy Assistance facility under the CIP-Intelligent Energy Europe Programme. This is being matched by a 10% contribution from the GLA.
