

The Mayor's budget

Each year, the Mayor of London has a multi-billion pound budget to improve London.

The budget supports investment in the key services that are essential to the capital.

Everything from policing, transport, fire services and the environment, to the work of City Hall.

The budget is funded from a mixture of taxes, transport fares, business rates and a small proportion of council tax, all of which combine to allow the Mayor to make the changes and improvements that help Londoners' lives run smoother.
