

You told us the existing station can feel unwelcoming and unsafe.

The above visualisation of Station Approach shows some of the proposed improvements.

OPDC is proposing to improve the entrances through new landscaping, street furniture, planting and new signage.

Proposed improvements

The drawing below illustrates where proposed improvements could be located.

The proposed improvements could include:

- trees, flowers and green space to make the area more welcoming
- benches and planting to create a more comfortable spaces for people waiting for buses
- new public artwork to reflect the character of the local area and make clear routes through the station
- clearer signage towards the station
- improvements to existing street furniture to tidy up the area
- a community notice board and space for a coffee kiosk or alternative activity

We would like you to let us know if you think these proposed improvements would be beneficial and if you have any other ideas that could make a positive change.

Below: Light touch changes are also being explored which could help in improve the route from Harrow Road.
